## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Objections***

2. Claims 1-8 are objected to because of the following informalities:

Claim 1 (line 2), "within which channel" should be changed to --within the light-conducting channel--.

Claim 1 (line 4), "which image sensor" should be changed to --the solid-state image sensor--.

Claim 1 (line 8), "which aligning means" should be changed to --wherein the aligning means--.

Claim 9 (line 1), "which holder" should be changed to --the holder--.

Claims 2-8 are objected as being dependent on claim 1.

Claim 10 is objected as being dependent on claim 9.

Appropriate correction is required.

### ***Specification***

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

3. The disclosure is objected to because of the following informalities:

The specification does not have section heading.

In the specification, page 7, line 21, "inner wall 102" should be changed to --inner wall 130--.

Appropriate correction is required.

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 8, 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 8 (lines 3-4) recites limitation “the image section is fixed in an orientation parallel to the optical axis,” which does not have support in the specification. Noted that Specification, pages 6-7 and Figures 1C-1D shows the image section 114 is perpendicular to the optical axis 106.

Claim 10 (lines 3-4) recites limitation “in which recesses are present in the outer wall near the corners, which recesses extend in a direction parallel to the optical axis,” which does not have support in the specification. Noted that Specification, page 7 and Figure 1D shows the recesses<sup>129</sup> are present in the inner wall of the holder 102.

#### ***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 9, 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoshino et al. (EP 1081944).

Regarding claim 1, Hoshino discloses a camera module (camera module 2, figures 3A-3B) comprising a holder (holder 18, figures 3A-3B, [0025]) with a light-conducting channel (lens barrel 19, figure 3B, [0025]), within which channel a lens (lens 21, figure 3B, [0025]) having an optical axis is present, a solid-state image sensor (imaging element 11, figure 3B, [0022]) being present near an end of said light-conducting channel, which image sensor comprises an image section (light receiving portion 15, figure 3B, [0022]) oriented perpendicularly to the optical axis, characterized in that aligning means (figures 3A-3B) forming part of the holder are present near the end of the light-conducting channel, which aligning means align the image section with respect to the optical axis.

Regarding claim 9, see Examiner's comment regarding claim 1.

Regarding claim 11, see Examiner's comment regarding claim 1, except for the feature "camera system," which is disclosed in Hoshino, figure 2, paragraph [0016].

Regarding claim 12, see Examiner's comment regarding claim 1.

#### ***Allowable Subject Matter***

8. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
